**PREVENT THE BAD BREATH**

1. Bad breath is the common name for the medical condition known as halitosis. There are many different things that can cause halitosis- from not brushing your teeth to certain medical conditions.

2. Something, a person's bad breath can blow you away- and he or she may not realize there's a problem. There are tactful (nice) ways of letting a person know that he or she has bad breathe. You could offer mints or sugarless gum without having to say anything.

3. If you need to tell a friend he or she has bad breath, you could say that you understand foods can cause bad breath because you've had it before yourself. If you suspect your own breath is foul, ask someone who will give you an honest answer without making fun of you. Although everyone gets bad breath sometimes, if you have bad breath a lot, you may need to visit your dentist or a doctor.

4. Poor oral hygiene leads to bad breath because when you leave food particles in your mouth, these pieces of food can rot and start to smell. The food particles may begin to collect bacteria, which can be smelly, too. Plus, by not brushing your teeth regularly, plaque (a sticky, colourless film) builds up on your teeth. Plaque is a great place for bacteria to live and yet another reason why breath can turn foul.

**Read the following poem carefully and answer the questions that follow :**

**MONEY**

When I had money, money, O!  
I know no joy till I went poor;  
For many a false man as a friend  
Came knocking all day at my door.  
Much have I thought of life, and seen  
How poor men's hearts are ever light;  
And how their wives do hum like bees  
About their work from morn till night.  
So, when I hear these poor ones laugh  
And see the rich ones coldly frown -  
Poor men, think I, need not go up  
So much as rich men should come down.  
When I had money, money, O!  
My many friends proved all untrue;  
But now I have no money, O!  
My friends are real, though very few.
